(EN) Important Monster® Performance and Safety Tips

Listen Responsibly

To avoid hearing damage, make sure that the volume on your music player is turned down before connecting your headphones. After placing headphones in / on your ears, gradually turn up the volume until you reach a comfortable listening level.

Noise levels are measured in decibels (dB), exposure to any noise at or above 85 dB can cause gradual hearing loss.

Monitor your use; hearing loss is a function of loudness versus time. The louder it is, the less time you can be exposed to it. The softer it is, the more time you can listen to it.

This decibel (dB) table compares some common sounds and shows how they rank in potential harm to hearing.

SOUND	NOISE LEVEL (dB)	EFFECT
Whisper	30	Very quiet
Quiet Office	50–60	Comfortable hearing levels are under 60 dB
Vacuum Cleaner, Hair Dryer	70	Intrusive; interferes with telephone conversations
Food Blender	85–90	85 dB is the level at which hearing damage (8 hrs.) begins
Garbage Truck, Cement Mixer	100	No more than 15 minutes of unprotected exposure recommended for sounds between 90–100 dB
Power Saw, Drill/Jackhammer	110	Regular exposure to sound over 100 dB of more than 1 minute risks permanent hearing loss
Rock Concerts (varies)	110–140	Threshold of pain begins around 125 dB

Chart information obtained from www.nidcd.nih.gov/health/education/teachers/pages/common_sounds.aspx

“... a typical person can safely listen to an iPod for 4.6 hours per day at 70% volume.”

“... knowing the levels one is listening to music at, and for how long is extremely important.”

From www.cbc.ca/health/story/2006/10/19/music-earphones.html

Get the most out of your equipment and enjoy great audio performance even at safe levels. Our headphones will allow you to hear more details at lower volume levels than ever before.

Use Responsibly

Do not use headphones when it's unsafe to do so—while operating a vehicle, crossing streets, or during any activity or in an environment where your full attention to your surroundings is required.

It's dangerous to drive while wearing headphones, and in many places, illegal because it decreases your chances of hearing life-saving sounds outside of your vehicle, such as another car's horn and emergency vehicle sirens.

Please avoid wearing your headphones while driving. Use one of Monster's FM transmitters to listen to your mobile media devices instead.

Learn how to establish a safe listening level and review other important safety guidelines from the Consumer Electronics Association at www.ce.org. Important information on how to prevent Noise-Induced Hearing Loss (NIHL) and a comprehensive list of which noises can cause damage can be found on the Deafness Research Foundation's website, www.drf.org.

Listen

Turn down the volume on your music player before putting on Inspiration headphones.

Note the “L” and “R” markings above the inside of each earcup. “L” is for the left ear. “R” is for the right ear.

Fold

Remove your headphone cable. Note the two folding hinges on the headband. Fold one side, then the other. Apply pressure to the hinge, not the earcup, when folding.

Store

When not in use, always store your headphones in the case.

Keep headphone case closed, and store in a clean, dry environment.

Avoid storage in extreme heat or cold.

⚠ The headband cover of your Inspiration headphones contains a magnet. When not attached to the headband, it can damage mechanical devices that are affected by a magnetic field. Keep loose covers away from pacemakers, cell phones, hard drives, credit cards, video tapes or other such devices.

Maintain

Clean ear cups and headband regularly with the supplied Monster Clean Cloth™ specially bonded with Agis Microbe Shield™ antimicrobial technology. Never get the speaker or electronics inside of your headphones wet. Water or cleaning solvents can do irreparable damage. The Inspiration warranty does not cover such damage.

Avoid exposure to water, temperature extremes, and high humidity.
